a better life[®]

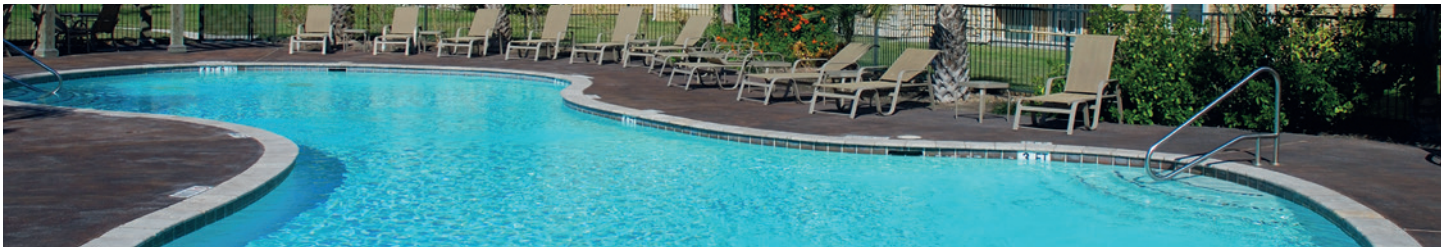

WATER TREATMENT

Soft, pure water. Under
any circumstances.

Choose the right water treatment with Zodiac[®]

Clear water to dive into and swim in with your eyes wide open...

This can remain a pleasure provided you keep choosing the right treatment solution. As a living environment, the water in your pool changes all the time: depending on the number of bathers, the weather and the temperature, the water can become cloudy or go green. Incorrectly dosed, treatment can also cause skin and eye irritation. With its ever-more effective treatment solutions, Zodiac® makes it easy for you to maintain clear, healthy water. And offers you incomparable bathing comfort, all the time.

Are you looking for a simple and effective chlorine treatment?

THE RIGHT CHOICE Zodiac®

Redox regulation

Chlorine treatment no longer has to prove its effectiveness in keeping water healthy and clear. On the other hand, it must be correctly dosed if you want to avoid skin irritation or the 'bleach smell' effect. 100% automated, Redox regulation includes Auto-Adaptive Dosing (AAD) technology to maintain ideal chlorine levels continuously in your swimming pool. Combined with automatic pH regulation, you are guaranteed a perfectly healthy swimming pool, without tedious dosing and manipulation.

Are you looking for a treatment combining efficiency and mildness?

THE RIGHT CHOICE Zodiac®

salt chlorinators

Inspired by the sea and its ecosystem, Zodiac® salt chlorinators work continuously, without adding chemical product and without requiring intervention or maintenance: electrolysis converts salt into chlorine, which recombines into salt under the action of UV rays in sunlight. Endlessly reproducing this cyclic reaction, they give you unequalled bathing comfort in very soft and slightly salted water (4 g of salt per litre, compared with 38 g per litre in sea water, for example). Combined with automatic pH regulation, they offer you a complete and totally automated water treatment solution for your swimming pool.

Are you looking for the most natural treatment possible?

THE RIGHT CHOICE Zodiac® Nature² mineral purification

Nature offers effective solutions for water treatment. Zodiac® has designed and perfected mineral purification technologies based on ceramic beads offering self-regulated mineral diffusion. These natural treatments combat bacteria, eliminate algae and retain micro-particles passing through the pool filter. They are used individually (Nature² Fusion purifier) or in addition to your usual treatment (Nature² Express purifier) to reduce your chlorine use by half. Combined with automatic pH regulation, they guarantee you soft, clear water, healthy and environmentally-friendly

ZODIAC® WATER TREATMENTS THE MOST DEMANDING SOLUTIONS FOR THE PURITY OF YOUR POOL

Chlor Expert Redox regulation

A regulation system for disinfection by automatic dosing of liquid chlorine that can be installed on all types of in-ground pools and maintains an ideal chlorine level. Fitted with a 'Boost' function for intensive bathing and alarms for overdosing and lack of treatment product. Compatible with the 'pH Expert' pH regulator for complete treatment.

TRi salt chlorinator

The most complete and most upgradable system in the range of Zodiac® chlorinators that, with its different models (TRi pH or TRi PRO), allows you to manage both the disinfection and pH regulation of your swimming pool completely automatically. Fitted with several safety alarms and 'Boost' function for intensive bathing and 'Low' when the damper is closed or during a winterizing period.

Ei salt chlorinator

The easiest salt chlorinator to install, with a patented attachment system for rapid installation, within reach of everyone in under 10 minutes. Can be fitted equally well on new constructions as on existing swimming pools and is suitable for all types of swimming pools, for safe, effective and long-lasting treatment. Compatible with the 'pH Expert' pH regulator for complete treatment.

Nature² Fusion mineral treatment

Complete, dual-action treatment, using self-regulated natural mineral diffusion that eliminates bacteria, algae and bugs, and a chlorine diffuser using blocks to complete the disinfectant action. Easy to install, without an electricity supply, and completely independent use. Compatible with the 'pH Expert' pH regulator for complete treatment.

'pH Expert' pH regulator

Essential for obtaining balanced water, whatever the treatment used, automatic or manual, pH Expert is essential for your comfort. Based on Auto-Adaptive Dosing (AAD) technology, it maintains the ideal pH automatically by adjusting the dosing time depending on the pH of your swimming pool. Result: perfectly balanced, healthy, soft, clear water.

WORTH KNOWING

7.2-7.4. This is the ideal pH range for the water in your pool. This provides optimum bathing comfort, without irritating the skin or eyes. And this ensures that treatment products are at their most effective which means smaller amounts are used.

ZODIAC® RECOMMENDATIONS

- Water alkalinity checked
 - = pH more stable
 - = optimum water balance

For water that is always balanced and healthy, the alkalinity of the water should be checked at the beginning of the season (this includes 'TAC' or 'buffering power'). The right alkalinity (between 80 and 150 ppm) will give you optimally-balanced water throughout the season and savings on treatment products.

ZODIAC® OFFERS A COMPLETE RANGE OF MANUAL TREATMENT PRODUCTS TO SIMPLIFY THE MAINTENANCE OF YOUR POOL.

- Renewed water for easier maintenance:

To enjoy water that is always bright and pure, Zodiac® recommends renewing part (approx. 1/4 to 1/3) of the water in your pool every year. By doing so, you will save on treatment products and your water will be easier to maintain.

ZODIAC®, THE RANGE

Zodiac® also offers treatment systems specifically for spas and indoor swimming pools.
